Freight Cost vs Delivery Days

KEY INSIGHTS OF OLIST E-COMMERCE SALES ANALYSIS

EXECUTIVE OVERVIEW

Revenue & Orders

- ₹13.6M revenue | 99K orders | ₹137 avg order value
- Revenue 10x grow kiya Jan 2017 → peak Jan 2018
- Sharp drop after Aug 2018 — data cutoff effect

Payments

- Credit Card = 73.9% — EMI culture dominant
- Boleto = 19% — unbanked population segment

Order Status

- 96.9% orders successfully delivered
- Score 1+2 = 11% reviews — delivery delay linked

PRODUCT ANALYSIS

Top Categories

- Health & Beauty = ₹1.26M — #1 revenue driver
- Watches & Gifts = ₹1.21M — high avg price
- Top 5 categories = ~50% of total revenue

Pricing

- Avg product price = ₹120 — mass market positioning
- "pcs" category = ₹1.4K avg — premium segment

Freight

- Toys & Stationery = highest freight (₹19)
- Heavier products = higher freight — confirmed correlation
- Freight optimization needed for low-margin products

CUSTOMER ANALYSIS

Biggest Risk

- Avg 1.00 order per customer — near-zero retention
- Almost no customer ordered twice

Geography

- SP = 42% customers — single state dependency
- RJ + MG = strong secondary markets
- RS + PR = untapped growth opportunity

Cities

- Sao Paulo city alone = 16% of all customers
- Tier-2 cities (Curitiba, Brasilia) show steady demand

DELIVERY & OPERATIONS

Big Win

- Delivery time: 50 days → 8 days in 18 months
- 84% improvement — strongest operational achievement

Problem Area

- 8K late deliveries — 8% late rate
- SP = 2.4K + RJ = 1.7K = 51% of all late deliveries
- Delayed orders avg rating = 2.5 vs on-time = 4.3

Current Status

- 92.1% on-time delivery rate
- Unavailable orders = 26% of pipeline — stock gap
